## SUMMARY

I am 20 years old and have two years of professional experience since the beginning of my Business Administration degree at UFPR. I have worked in the Financial Market developing solutions to support strategic planning and decision making. I have experience in logistics, contract and agreement management for payroll loans, banking systems and regulations, and data development/analysis using Python. Currently, I work as a Risk Analyst at Grupo Senff, focusing on data analysis with Python, Power BI, and SQL to support decision-making. I also have experience in risk management, process control, and team coordination, with an emphasis on accuracy and efficiency.

## SKILLS

- Python | Git | Machine Learning | API | VSCode | Latex | Power BI | Kanban | Google Sheets | Office
- Advanced English | Basic Spanish

## PROFESSIONAL EXPERIENCE
